

SIGNAL PROPAGATION METHOD FOR WIRELESS NETWORK

ABSTRACT OF THE DISCLOSURE

- 5 A signal propagation method is proposed for propagating a wireless signal from a first access point of a first wireless network to a second access point of a second wireless network comprising steps of providing a third access point for transmitting and receiving the wireless signal; transmitting the wireless signal from the first access point to the third
- 10 access point; and transmitting the wireless signal from the third access point to the second access point.
